# The economy is in the tank!!!

**It is a great time for entrepreneurial students to start their own business!**

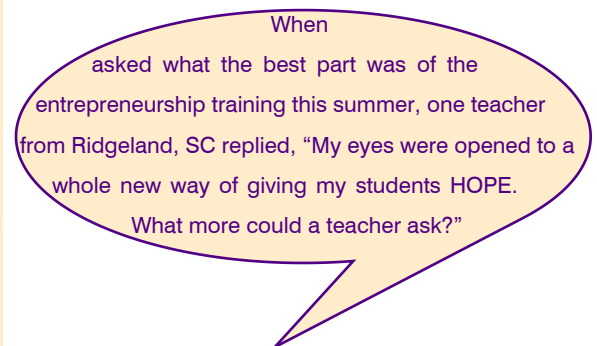

YEScarolina was formed to provide a way for young people to be able to recognize an opportunity and a bad economy provides the perfect backdrop.

There will be jobs loss, business failure , banks not lending money except to a small percentage of our population. As bad as it will get, there will be opportunities for the informed to take advantage of the situation.

How, do you ask? Lets take a landscaping business with a high payroll that loses a number of its customers. This will provide an opportunity for a young person to start his or her yard maintenance business by picking up the lost customers at a reduced fee. This a natural progression in the business world.

There will be many such opportunities , all we need to do is look for them and act.

**Go for it!**

## Upcoming Events:

**New CET Training  
January 14-17, 2009  
Please recommend our class  
to middle school teachers!**
